

VINYL *Liners*

8 STEP PROCESS TO
INSTALLING A VINYL LINER POOL!

STEP 1

We Measure the Pool

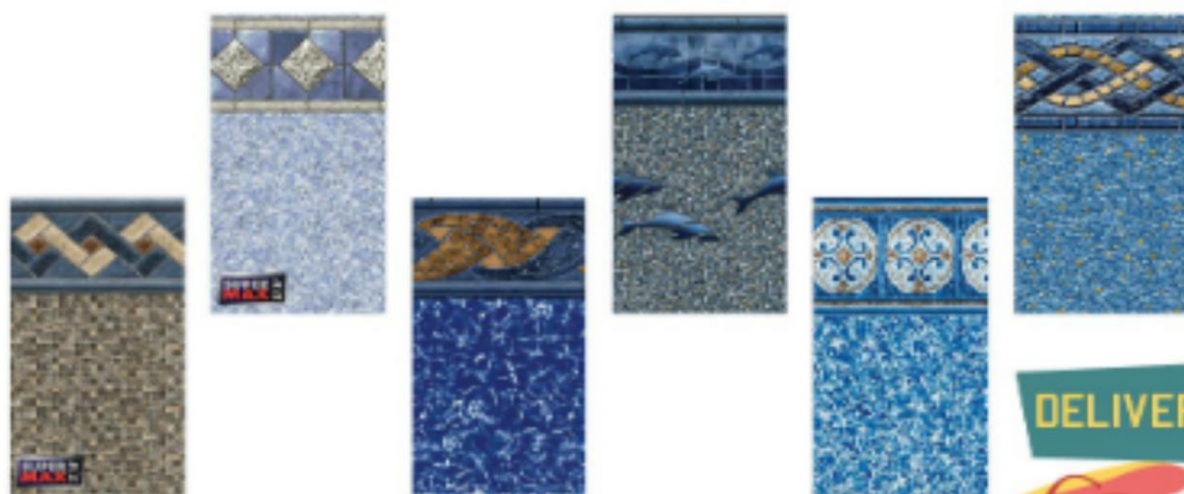

ACCURACY IS THE KEY. PRECISE MEASUREMENTS ARE A MUST. THERE IS NO SUCH THING AS A STANDARD SIZE POOL. BE SURE TO CONTACT YOUR LOCAL POOL BUILDER TO GET ACCURATE MEASUREMENTS.

STEP 2

You Choose a Liner Pattern

REMEMBER, THE COLOR OF YOUR FILLED POOL WILL BE DEPENDENT ON THE COLOR OF YOUR VINYL LINER.

DELIVERY

time

2-5 WEEKS

PATTERN DOES NOT DETERMINE PRICE, ONLY MIL. (THICKNESS)

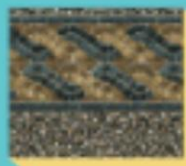

Base Price

20 MIL.

Lifecycle of a vinyl liner is much more about care of the liner than it is about mil thickness. The strength of a liner is in the seams. The exclusively Latham Ultraseam process produces the strongest seams available to the consumer market. The key to a longer lifecycle is consumer education, particularly in the area of water balance. A very simple rule of thumb to increase liner life is to visit your local pool on a regular basis for a water sample test.

STEP 3

We Drain the Pool / Remove Old Liner

WE PERFORM ANY NECESSARY REPAIRS OF ROUGH PATCHES, PROTRUSIONS, CRACKS, OR CRATERS IN THE WALLS AND FLOOR. WE THEN CLEAR ALL DEBRIS, AND CLEAN ALL SURFACES UNTIL IMMACULATE.

STEP 4

We Drop and Align New Liner

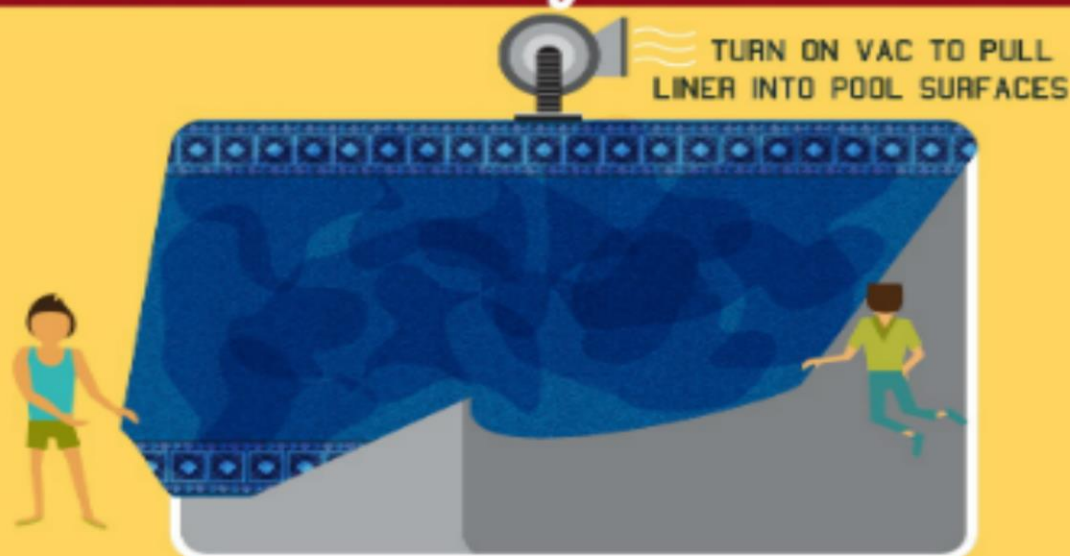

WITH LATHAM'S NEW ULTRA-SEAM TECHNOLOGY → UNATTRACTIVE SEAMS CAN BE LEFT IN THE DARK AGES

STEP 5

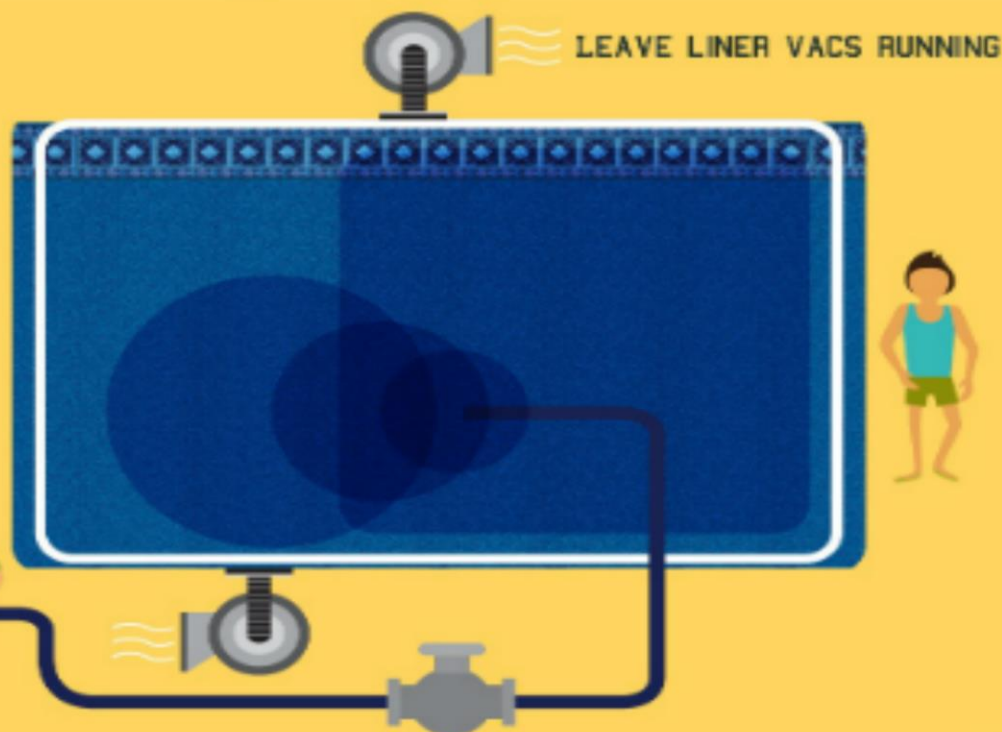

We Smooth all Surfaces and Wrinkles

WE SMOOTH ALL SURFACES OF WRINKLES, MOVING VINYL FROM AREAS OF LOOSE FIT (TOO MUCH MATERIAL) INTO AREAS OF TIGHTER FIT (STRETCH).

STEP 6

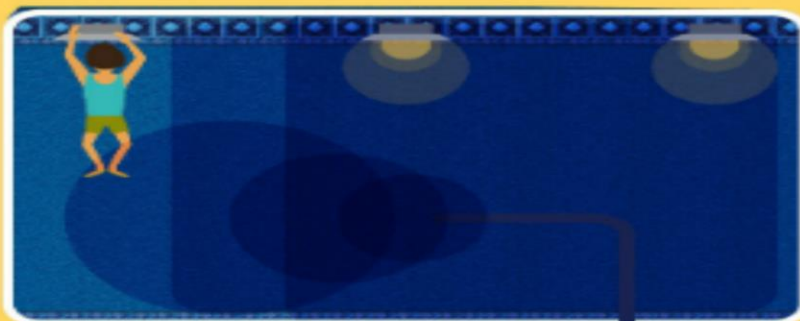

We Seal Liner of Air Leaks and Start Water Fill

VERY IMPORTANT: NO VINYL IS CUT UNTIL LINER HAS BEEN SEATED INTO PLACE BY WATER WEIGHT.

STEP 7

We Cut Remaining Vinyl from any Opening

STEP 8

Time for You to Jump in and Enjoy!
